

Important Information

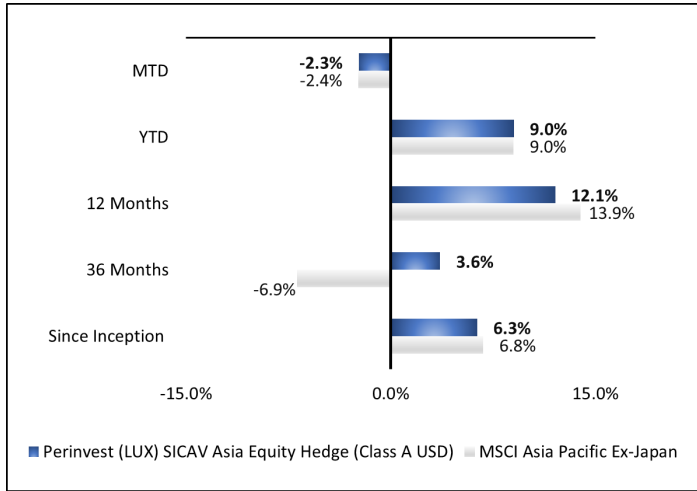

- The Fund invests in equities and equity-related securities of companies in or conducting the bulk of their business activities in Asia.
- The Fund's investment may be concentrated in the markets in the Asia region and the value of the Fund may be more volatile. Investing in emerging markets may involve increased risks, including liquidity, currency/currency control, political and economic uncertainties, legal and taxation, settlement, custody and volatility risks.
- The Fund may invest in derivatives for investment or hedging purposes who may involve counterparty/credit, liquidity, valuation, volatility and over-the-counter transaction risks. Exposure to derivatives may lead to a high risk of significant loss by the Fund.
- Dividends may be paid out of unrealized capital gains at the discretion of the Manager which would effectively represent paying dividend out of capital. This amounts to a return or withdrawal of part of an investor's original investment or any capital gains attributable to that original investment. Payment of dividends may result in an immediate reduction of the net asset value of the Fund per unit.
- Investors are responsible for their investment decisions and should ensure that the intermediary has advised on Fund's suitability and consistency with their investment objectives. If in doubt, please seek independent financial and professional advice.
- Investors should not invest in this Fund based solely on this document and should read the relevant offering documents (particularly the investment policies and risk factors) for more details before investing.

Investment Objective

To achieve long-term capital growth in the value of assets by investing in **equities** or equity related instruments of **Asian companies** which offer a) strong cash-flows to support a **sustainable dividend yield** of approximately 5%; b) **attractive valuations** in relation to both historic and market comparatives and intrinsic value; c) **low net debt** (or net cash); d) **strong growth potential** or re-rating capability.

The investment manager will from time to time, depending on market conditions, put in place market hedges to reduce downside volatility and to protect against undue capital losses.
